( 2020-2023 )  
CGPA - 68.9 %

## PROJECTS

ONLINE LIBRARY MANAGEMENT SYSTEM

Objectives :

Online library management system typically revolve around improving efficiency, accessibility, and user experience for both librarians and patrons. Here are some common objectives:

**Automated Cataloging:** Implement a system to automate the cataloging process for library materials such as books, journals, and multimedia resources.

**Efficient Search and Retrieval:** Provide users with an intuitive search interface to quickly locate library resources based on various criteria such as title, author, subject, or ISBN.

**User Authentication and Access Control:** Ensure secure access to the system with user authentication mechanisms, and implement access control policies to manage user permissions based on roles (e.g., librarian, student, faculty).
